

# PROJECT ONE (PART2)

**GOAL** To create a Type Specimen for a web font using html, and in doing so gain understanding of web fonts and CSS positioning.

- SKILLS**
- Demonstrate understanding of web fonts vs print
  - Demonstrate ability code out a static design using HTML and CSS
  - Demonstrate ability to add web fonts from typekit or google font.
  - Demonstrate understanding of grid structure in web design.

**REQUIREMENTS:** Starting with your initial design you can sketch out wire-frames to help you translate your design to HTML. Feel free to make adjustments or changes to your initial design once you start your code.

**(PART 2)**

- Create an index.html file with your type specimen content.
- Add web font, use google font or typekit.
- Create a CSS file to style and position your type specimen.

## IMPORTANT!!!

If you are using typekit remember to add <http://www.laurahuisinga-design.com> to your typekit and re-publish.

**DELIVERABLES** Final product will be a folder with one index.html file and one style.css file turned in on google classroom. Also put your files on the server using code anywhere to FTP them.

**(PART 2)**

**Final Critique: 2/27** DUE: Wed 3/1

**Final Critique: 2/28** DUE: Thur 3/2
